*Bachelor of Science in Computer Science; CGPA: 3.72/4.0 (till 4th Semester)* *Dec. 2021 – Oct. 2025*

### PROJECTS

---

- **React Meals**
  - React Meals is a user-friendly, single-page web application built using React.js that allows users to explore a delightful array of meals and easily add them to a virtual cart for ordering.
  - This project combines the power of modern web technologies and a sleek, responsive design to provide a seamless and enjoyable food ordering experience.
  - **Github Repository:** <https://github.com/Mirza-Moiz/food-order-app>
  - **Deployed Landing:** <https://food-order-app-eta-one.vercel.app/>
- **My Quotes**
  - My Quotes is a React-based web application designed to provide users with a daily dose of inspiration and motivation through a collection of thought-provoking and uplifting quotes.
  - This application allows users to read, save, and contribute their favorite quotes, fostering a positive and supportive online community.
  - **Github Repository:** <https://github.com/Mirza-Moiz/my-quotes>
  - **Deployed Version:** <https://my-quotes-nine.vercel.app/quotes>

### PROGRAMMING SKILLS

---

- **Languages:** C++, JavaScript
- **Frontend:** React, tailwind, Redux, Bootstrap
- **Backend:** Node, Express, MongoDB, MySQL
- **Other:** Git, Github
